# GIRLS

## 2 to 20 Years Growth Velocity-for-Age

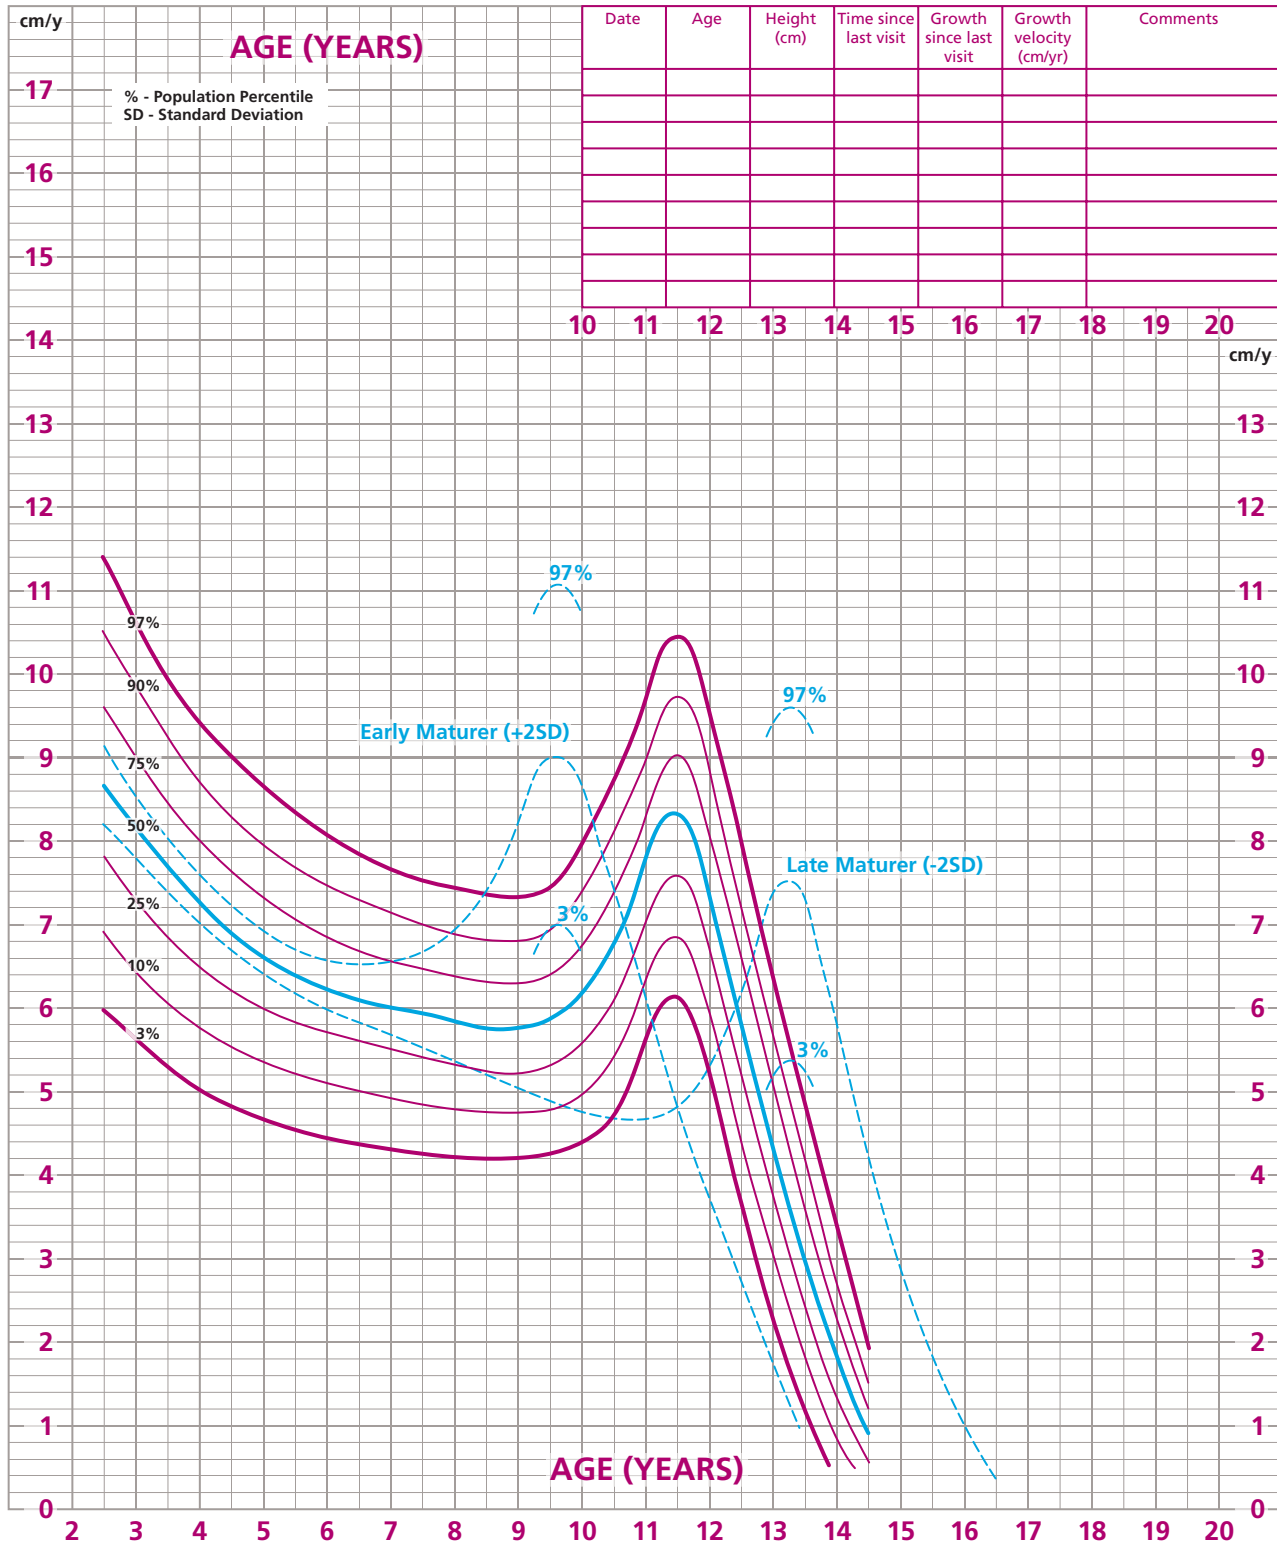

Name: \_\_\_\_\_

DOB: \_\_\_\_\_ ID: \_\_\_\_\_

### Growth velocity instructions:

- Plot the prior annual growth in centimeters using the difference of the current height and the height recorded closest to 12 months prior (to discount seasonal growth differences).
- If a period of more than 13 months or less than 11 months is used, convert to annual growth by multiplying the height difference by 12 and dividing by the actual growth period (in months).
